

# Panduan Check Readiness **TOEFL ITP Digital**

## 3 Hal penting sebelum Ujian

1

Cek Minimum  
System  
Requirements

2

Lakukan  
Check  
Readiness

3

Download  
Secure  
Browser

## Minimum System Requirements untuk Peserta

- Windows® 10.0 atau lebih baru (Microsoft Edge®)
- macOS® Catalina® 10.15.7 atau lebih baru (Safari® 15.0+)
- Browser yang didukung: Microsoft Edge (Windows) & Safari (Mac)
- NET Framework minimal versi 4.6 (sudah terpasang)
- Laptop/PC dengan webcam (wajib, built-in atau eksternal)
- Koneksi internet dengan kuota minimal 5–7 GB
- Zoom terinstal di handphone
- Headset/earphone berkabel (digunakan hanya saat sesi listening)

## Test Taker Readiness (H-2 / H-3 Sebelum Ujian)

- Pastikan setiap komputer peserta telah melakukan system check (check readiness)
- Pastikan secure browser sudah diunduh dan terpasang
- Headphone wajib tersedia untuk sesi Listening
- Akses dan lakukan pengecekan melalui: [www.ets-ellonline.org](http://www.ets-ellonline.org)

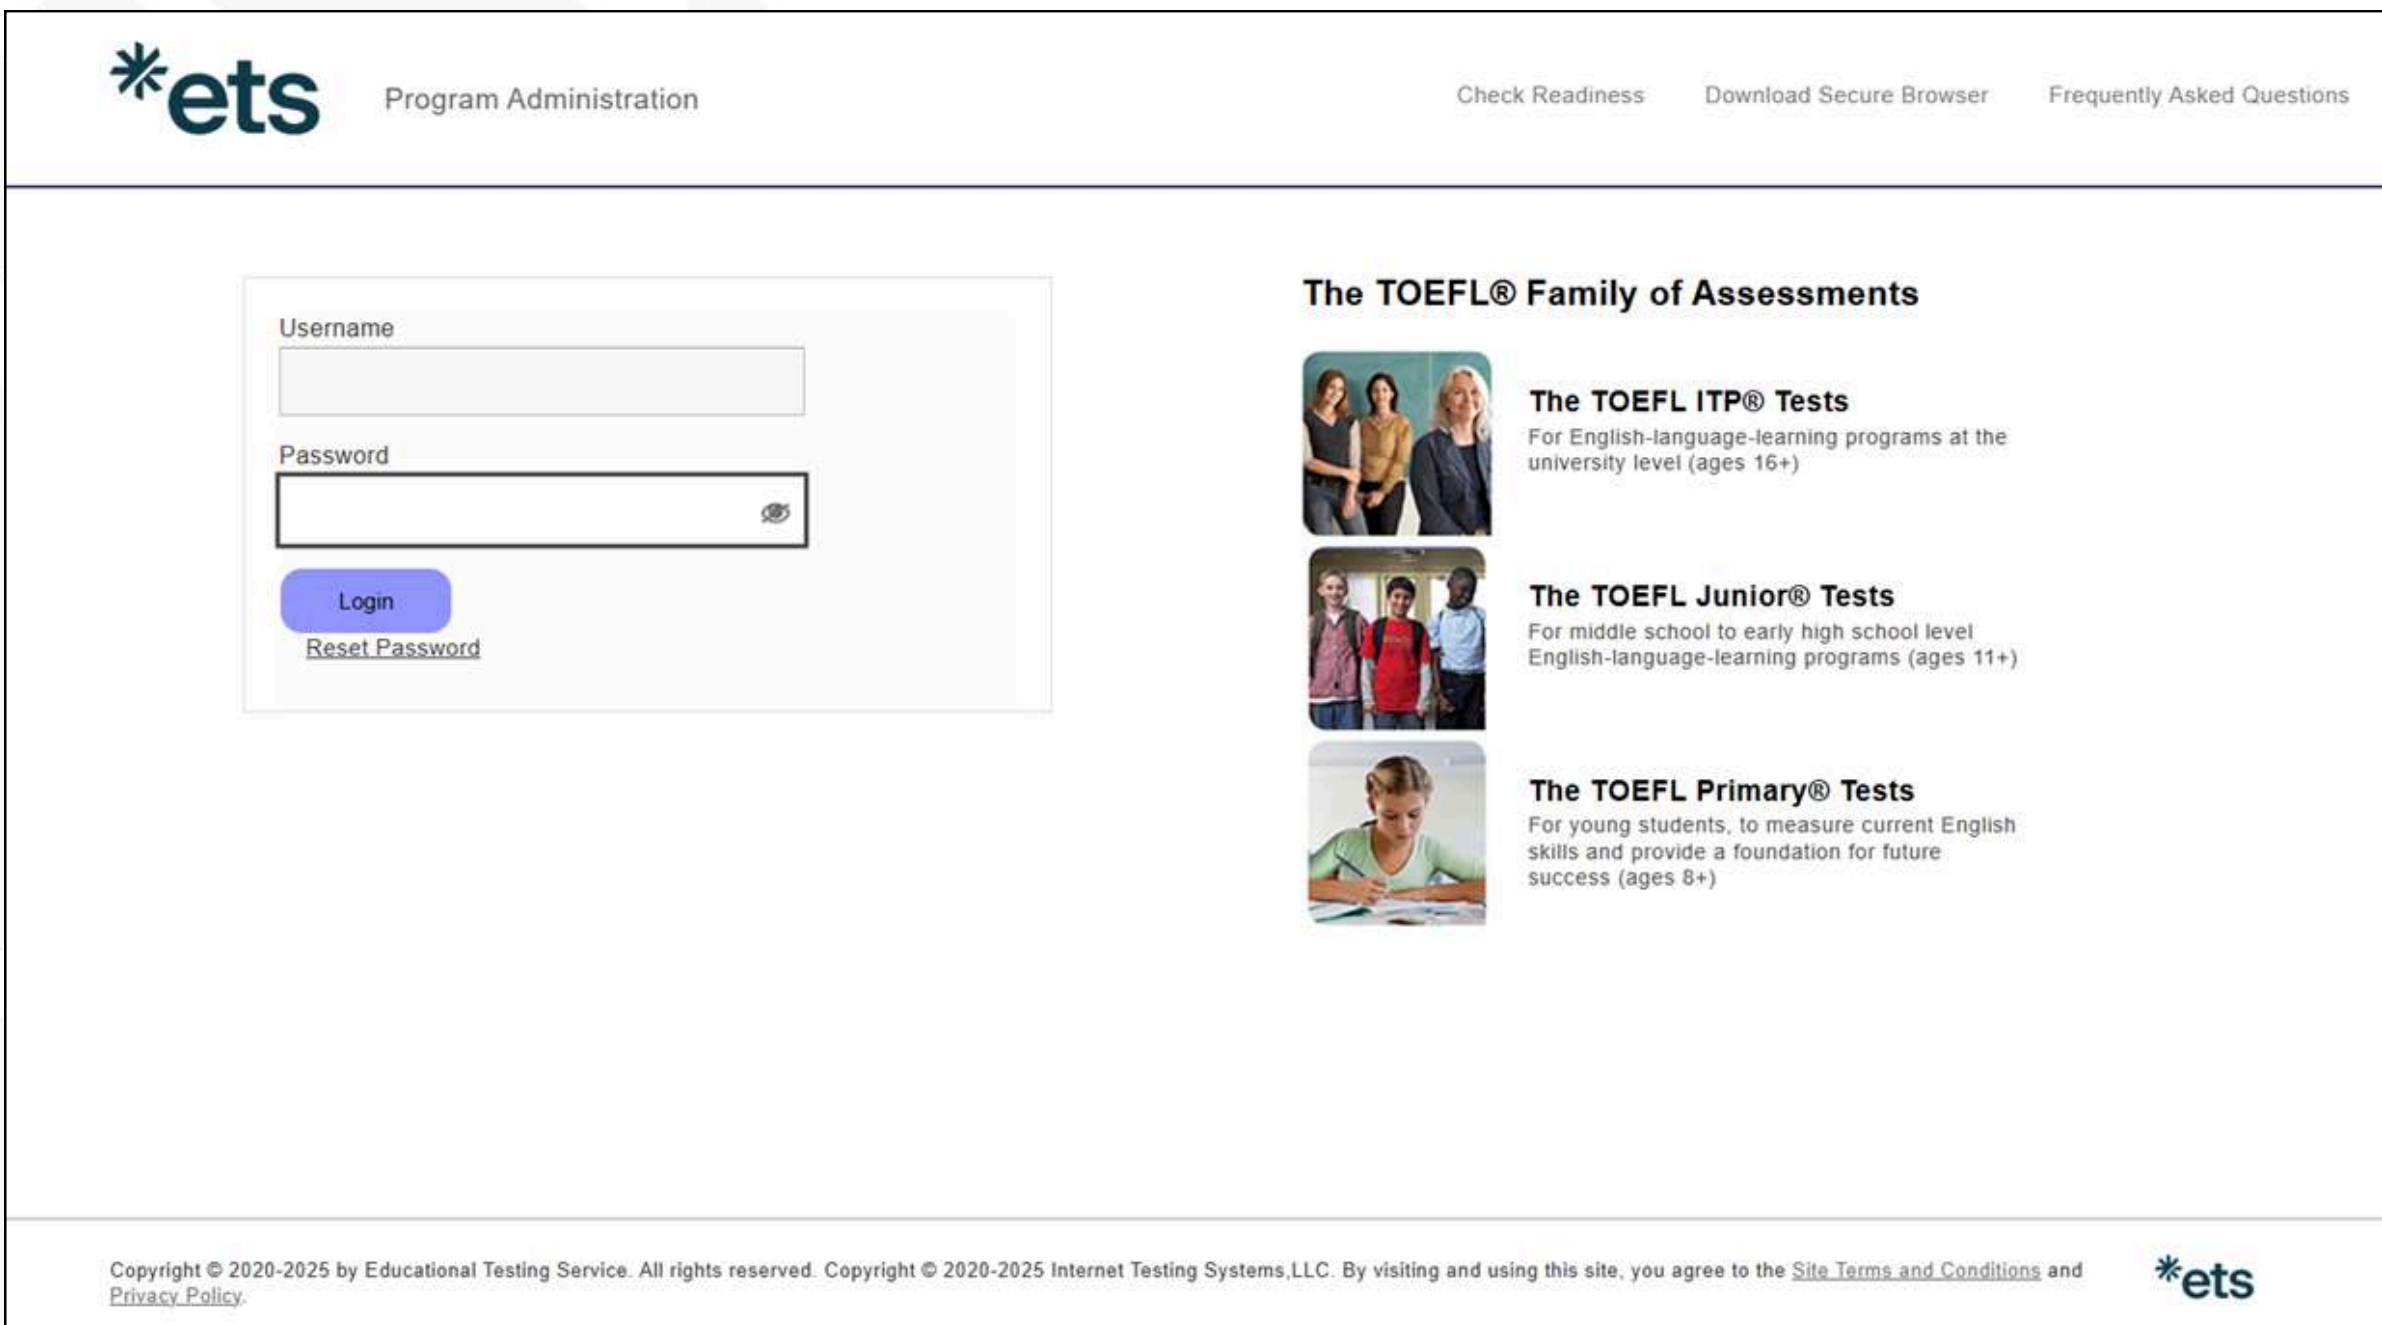

# Check Readiness

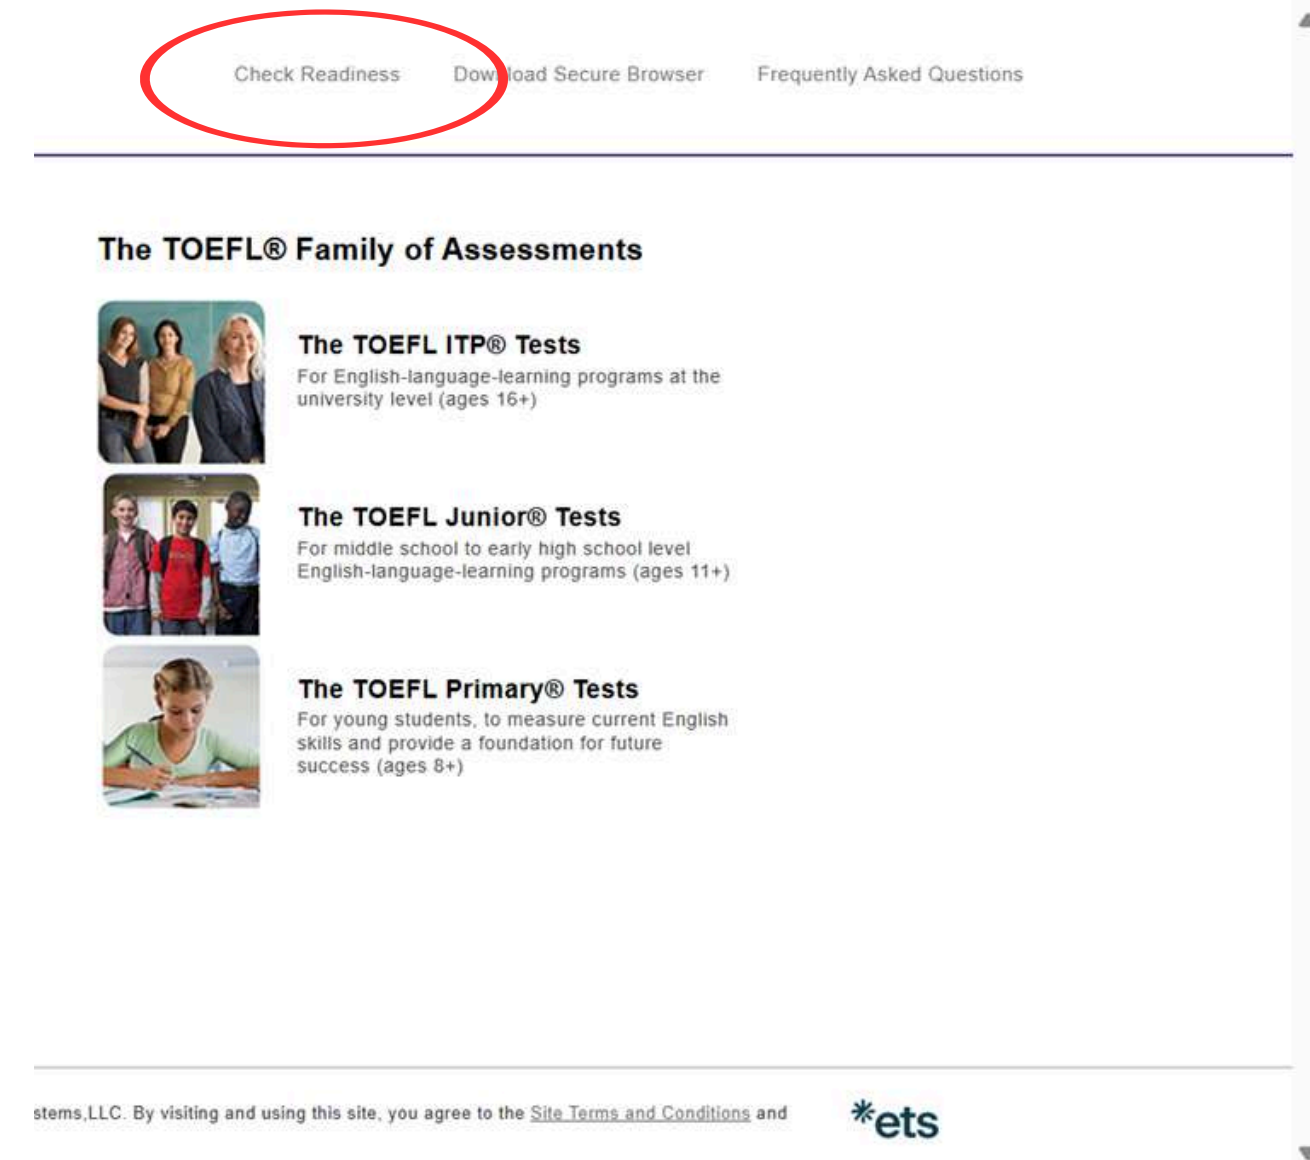

# 1 Akses dan lakukan pengecekan melalui: [www.ets-ellonline.org](http://www.ets-ellonline.org)

## Klik menu “Check Readiness”

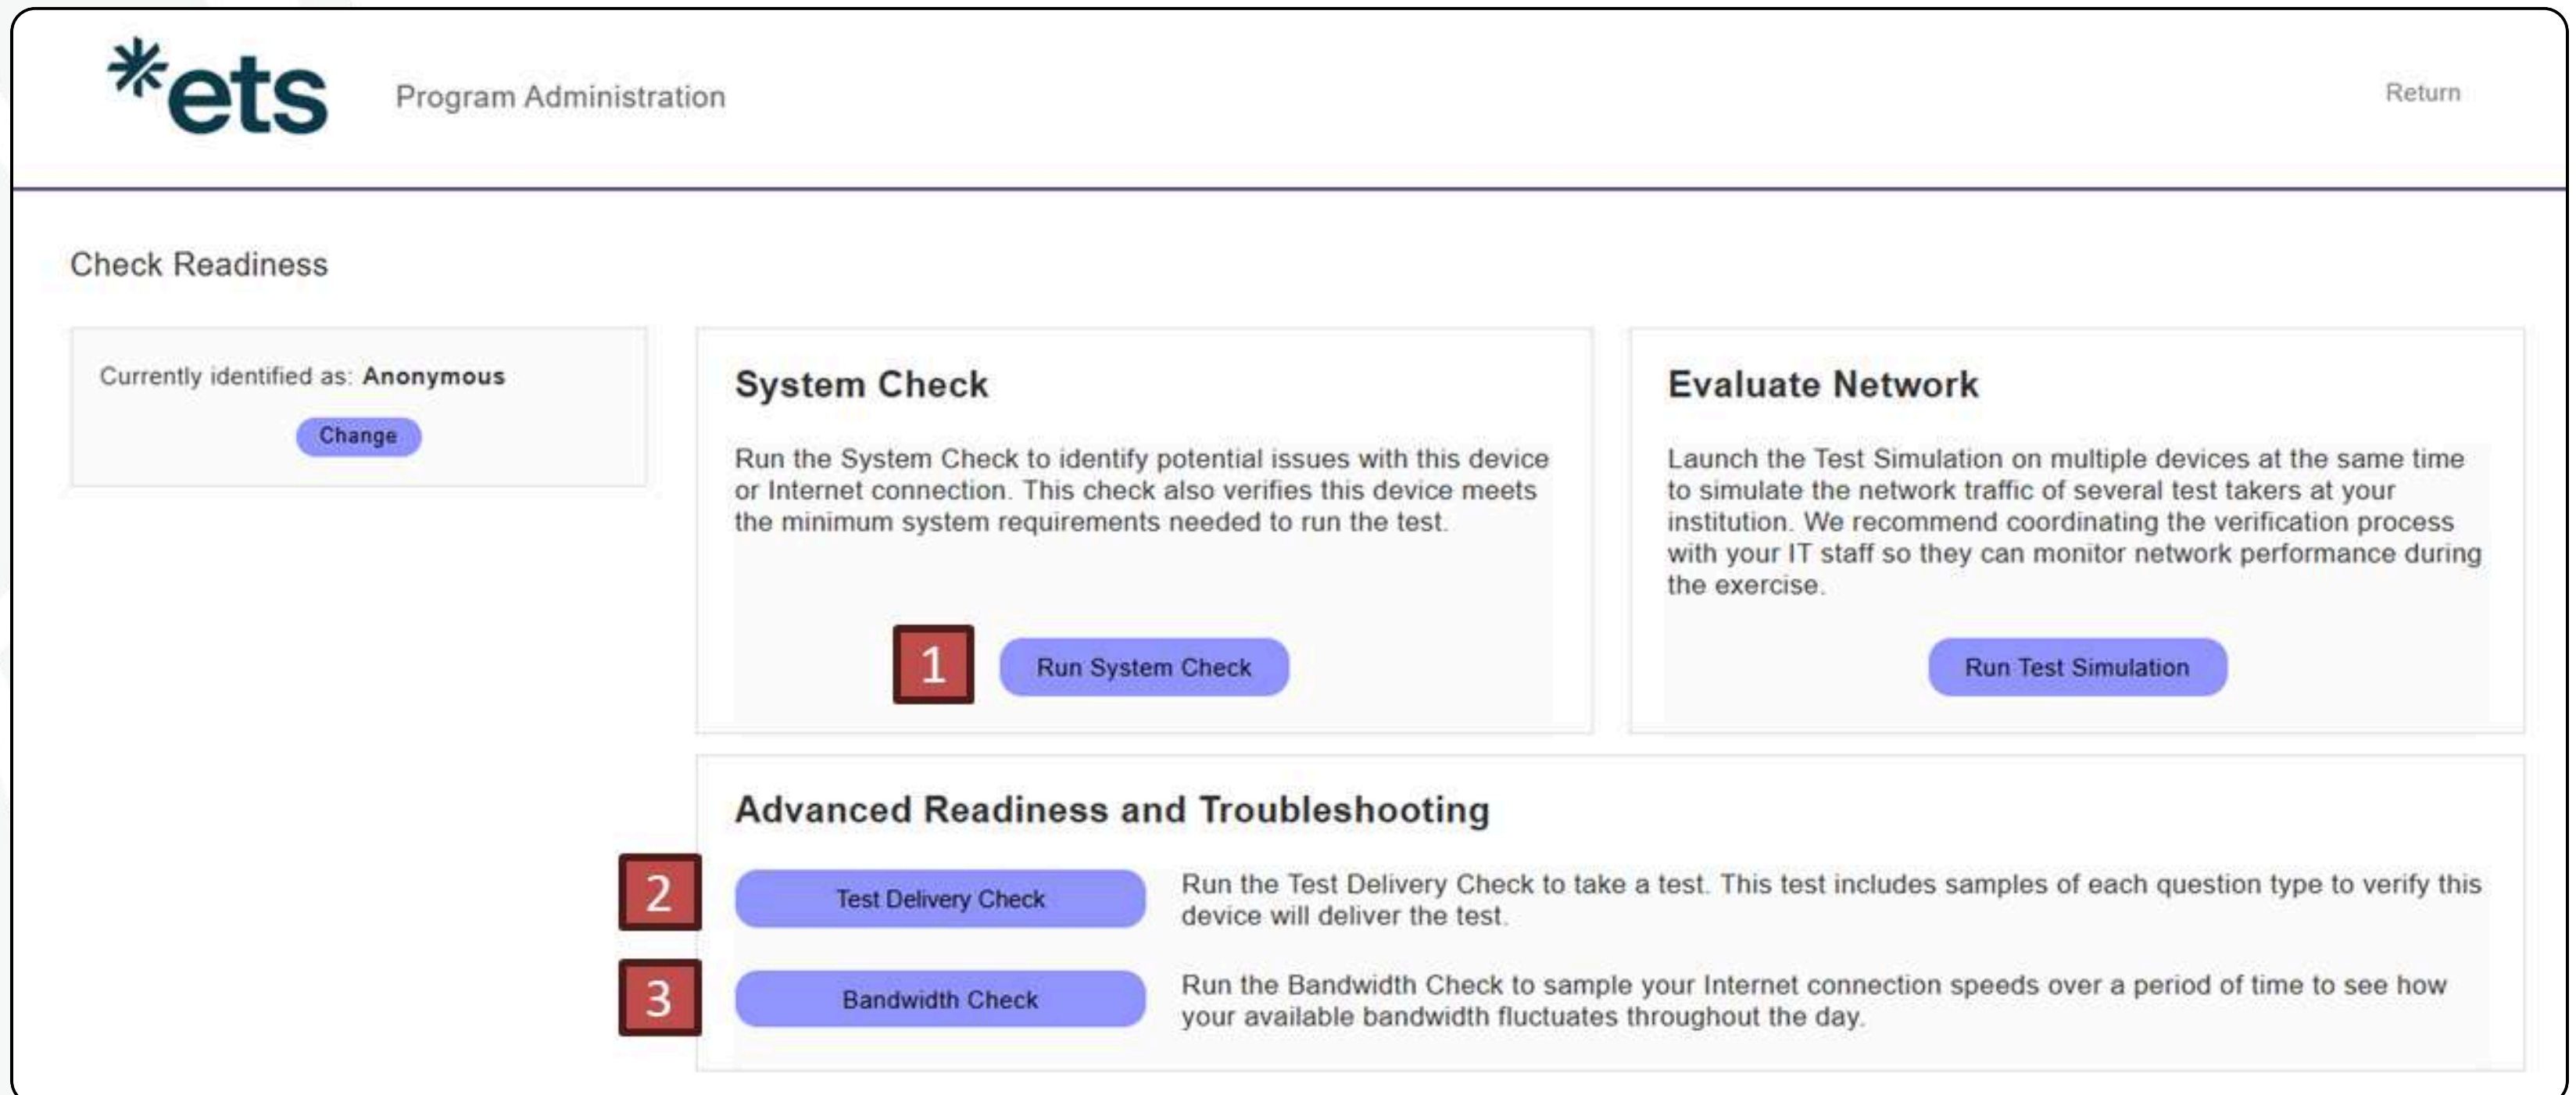

The screenshot shows the ETS Program Administration website. At the top left is the ETS logo and "Program Administration". At the top right are links for "Check Readiness", "Download Secure Browser", and "Frequently Asked Questions". On the left is a login form with fields for "Username" and "Password", a "Login" button, and a "Reset Password" link. On the right is a section titled "The TOEFL® Family of Assessments" with three options: "The TOEFL ITP® Tests" (for university level, ages 16+), "The TOEFL Junior® Tests" (for middle school to early high school level, ages 11+), and "The TOEFL Primary® Tests" (for young students, ages 8+).

This is a close-up of the navigation menu from the previous screenshot. The "Check Readiness" link is circled in red. Below the menu is a section titled "The TOEFL® Family of Assessments" with three options: "The TOEFL ITP® Tests" (for university level, ages 16+), "The TOEFL Junior® Tests" (for middle school to early high school level, ages 11+), and "The TOEFL Primary® Tests" (for young students, ages 8+).

## 3 Pada Tahap Check Readiness, Terdapat 3 Langkah yang Harus Dilakukan

**ets** Program Administration Return

### Check Readiness

Currently identified as: **Anonymous**  
[Change](#)

#### 1 System Check

Run the System Check to identify potential issues with this device or Internet connection. This check also verifies this device meets the minimum system requirements needed to run the test.

[Run System Check](#)

#### Evaluate Network

Launch the Test Simulation on multiple devices at the same time to simulate the network traffic of several test takers at your institution. We recommend coordinating the verification process with your IT staff so they can monitor network performance during the exercise.

[Run Test Simulation](#)

#### 2 Test Delivery Check

Run the Test Delivery Check to take a test. This test includes samples of each question type to verify this device will deliver the test.

#### 3 Bandwidth Check

Run the Bandwidth Check to sample your Internet connection speeds over a period of time to see how your available bandwidth fluctuates throughout the day.

#### Advanced Readiness and Troubleshooting

## 3 Langkah Check Readiness

### 1 Run System Check

Memastikan perangkat memenuhi minimum system requirements untuk menjalankan tes

### 2 Test Delivery Check

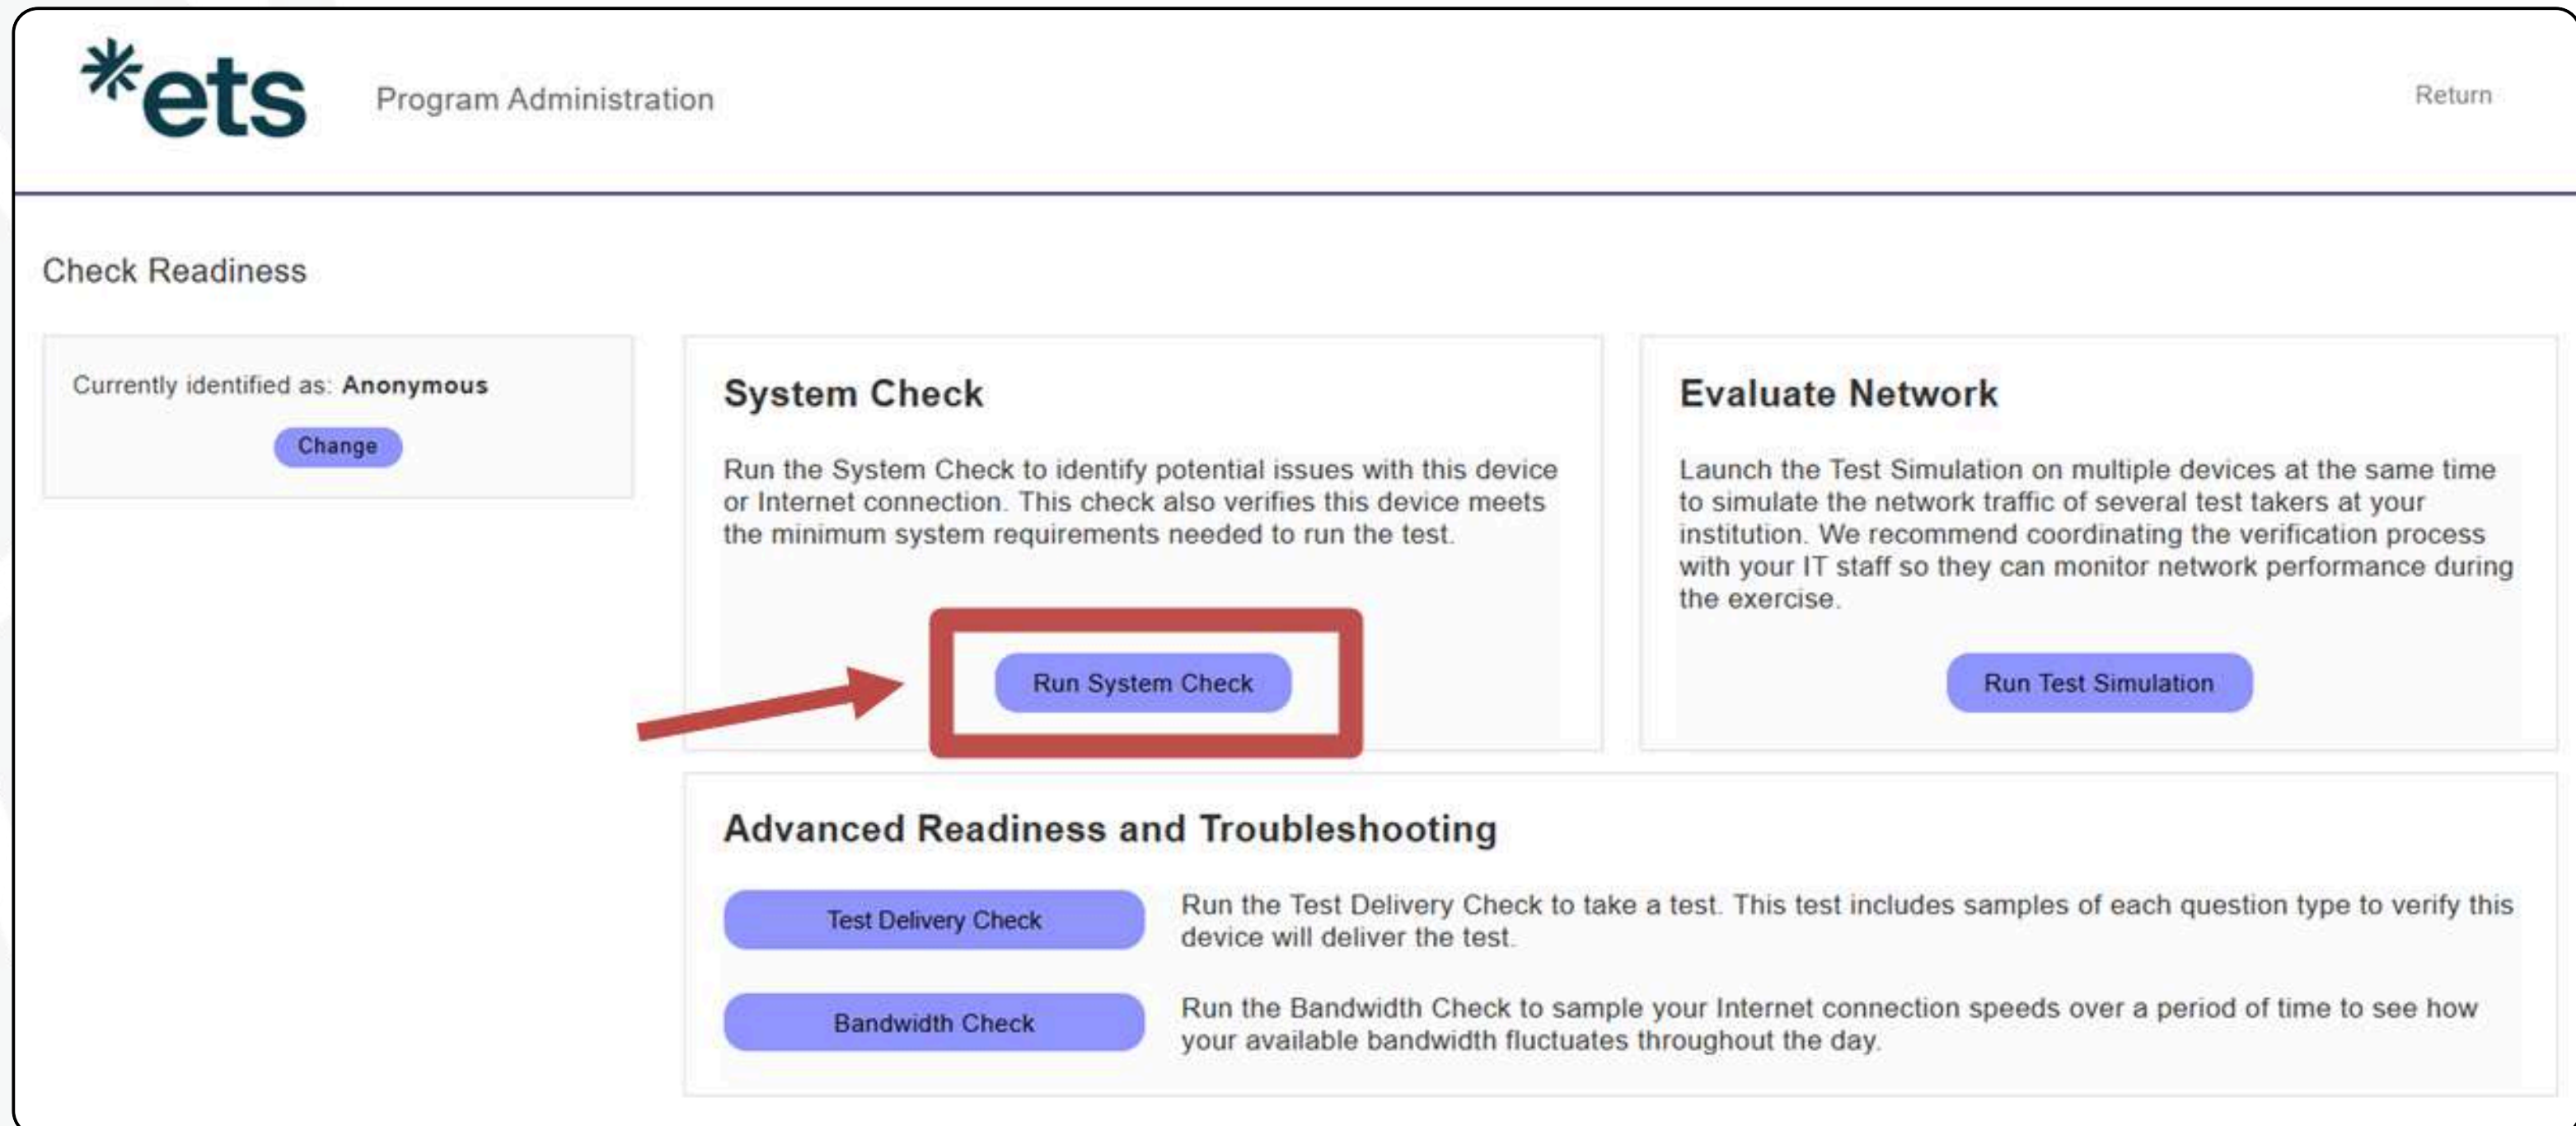

Menguji perangkat dengan simulasi soal untuk memastikan tes dapat berjalan dengan baik

### 3 Bandwidth Check

Mengecek kestabilan dan kecepatan koneksi internet selama periode waktu tertentu

## Check Readiness - Run System Check

### 1 Klik "Run System Check"

### System Check

Currently identified as: **Anonymous**

[Change](#)

The System Check tests your device to make sure it meets the minimum requirements for test delivery. At the completion of the check, you will be provided with information regarding the specific device used and current internet connection information and possibly a list of potential issues that need to be corrected prior to testing.

#### System Check Information

Run the System Check on all devices used for testing. For best results, close any applications that may be running on this device as well as any additional browser windows or tabs that may be open.

Number of Checks	13
Number of Checks Passed	10
Number of Checks Warned	3

## Check Readiness - Run System Check

**Supported (Need Attention)** → Perangkat dapat digunakan, namun ada hal yang perlu diperbaiki/diperhatikan

Catatan : Pada tahap ini harap diperhatikan icon (seru) , tanda icon tersebut adalah notifikasi yang harus anda perhatikan.  
Pada umumnya tanda icon tersebut di ikuti oleh informasi terkait “Minimum Requirement”.

Jika notifikasi tersebut mengenai “Internet Connections”, biasanya kualitas dari koneksi internet yang sedang digunakan kualitasnya kurang baik dan tidak memenuhi kriteria minimum. Dan jika notifikasi tersebut mengenai “Browser”, dapat di coba menggunakan jenis browser yang lainnya.

Pada umumnya notifikasi tersebut menginformasikan secara detail apa saja yang perlu diperhatikan oleh calon peserta test. Anda dapat melaporkan hal tersebut kepada Institusi.

# Check Readiness - Run System Check

---

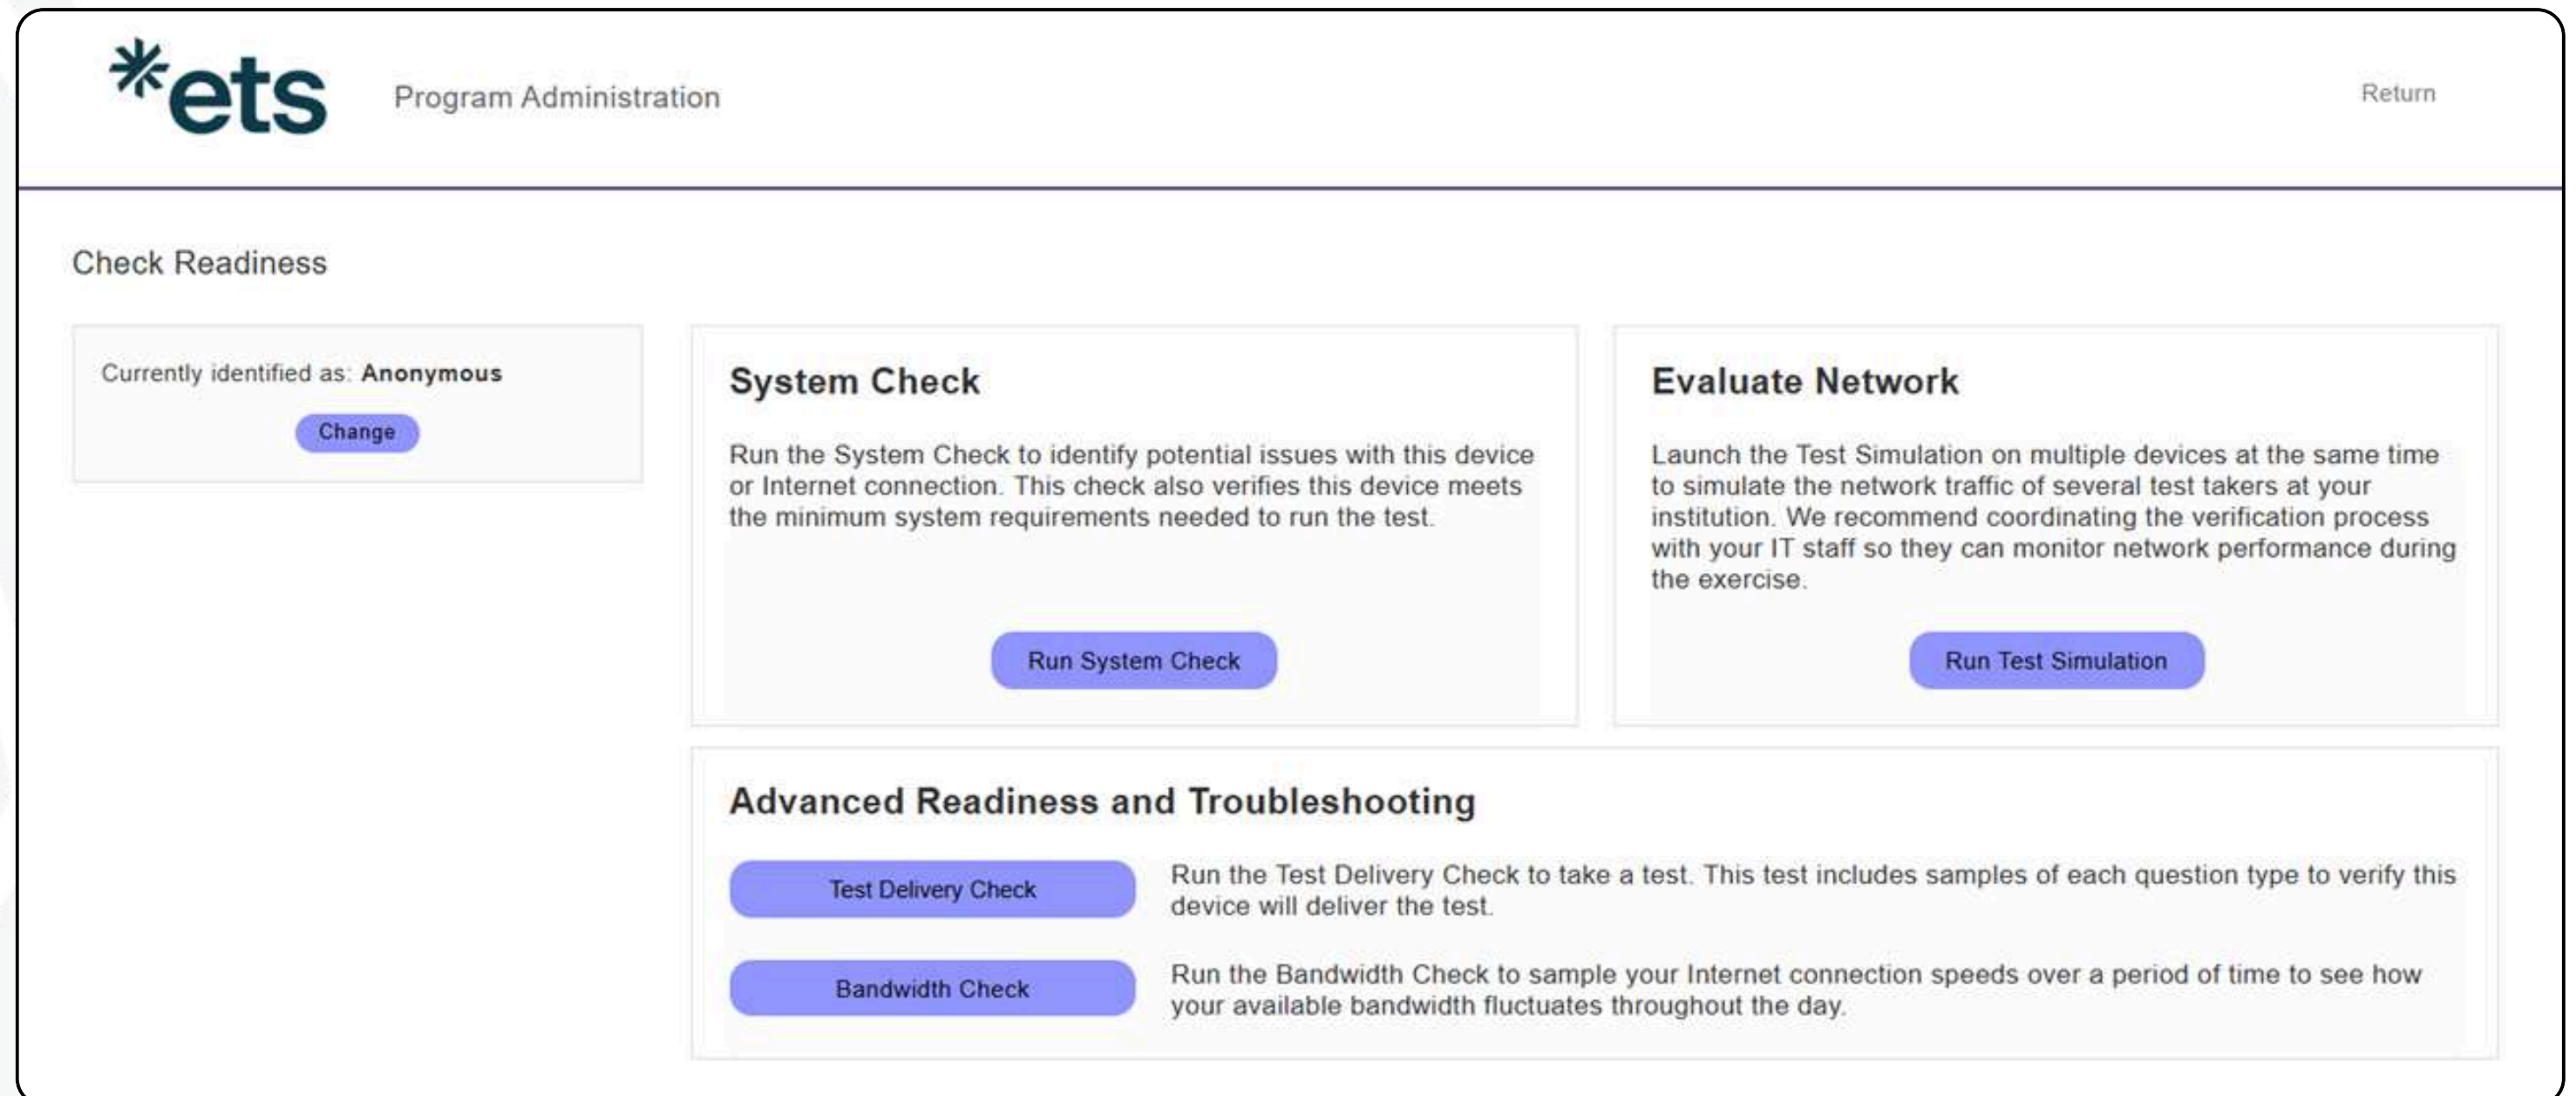

This device does not meet all site requirements. Use the information provided in the table below to configure this device to meet all site requirements and run the System Check again. A Secure Browser may be required for delivery of the operational test. If needed, be sure to install the Secure Browser on the device prior to the test.

### Results

Check	Status	Details
Browser	 Warning	This browser is not the browser needed for secure testing. Perform this check again using Microsoft Edge.
Internet Connection	 Not Supported	The current Internet bandwidth available to this computer is insufficient for testing. This site requires a minimum download speed of 410 kbps (50 kB/s) and a minimum upload speed of 250 kbps (30 kB/s). Check with your Internet Service Provider or local technical administrator regarding how to improve the connection speed. <a href="#">View More</a>
Trace Route	 Warning	The traceroute could not be completed successfully. The traceroute works by sending a packet of data from our server to the WANIP currently identified for this device, one hop at a time. At each hop, a response is returned so that we know the packet has successfully arrived at its destination. A common cause of this check failing is that a router has not been configured to send a response when the packet of data has been received, which could be for a variety of reasons including to increase performance. Run the check again and if you continue to experience this error, contact support for further assistance.
Trace Route - Number of Hops	 Warning	The number of hops between our server and the WANIP currently identified for this device has exceeded the maximum allowed number of hops of 30. See the traceroute details to make sure there is not any repeating of routers that could indicate a loop and run the check again. If you continue to experience this error, contact support for further assistance.
Trace Route - Latency	 Warning	We detected one or more hops exceeded the allowed maximum time of 500 milliseconds. This could be the result of a temporary interruption or indicate that there is a bad router between your device and the testing servers. Run the check again and if you continue to experience this error, contact support for further assistance.

## Check Readiness - Bandwidth Check

- Klik ikon “Bandwidth Check Information” dan pilih “One Time Check”
- Masukkan lokasi tes pada kolom “Comments”

### Bandwidth Check Information

The Bandwidth Check tests your network's ability to transfer data to and from our servers using a series of checks spaced 15 minutes apart to provide a view of how the network is performing. This does not check the bandwidth of your ISP like other speed tests you will find online, but rather simulates how data will be transferred during a test.

[SHOW ALL PLATFORMS](#)

### TOEFL Secure Browser for Windows

The Windows Secure Browser is a locked-down version of an internet browser that prohibits access to other applications during testing. This Secure Browser requires an installation that requires administrative privileges. Once installed, administrative privileges are not required to launch the Secure Browser.

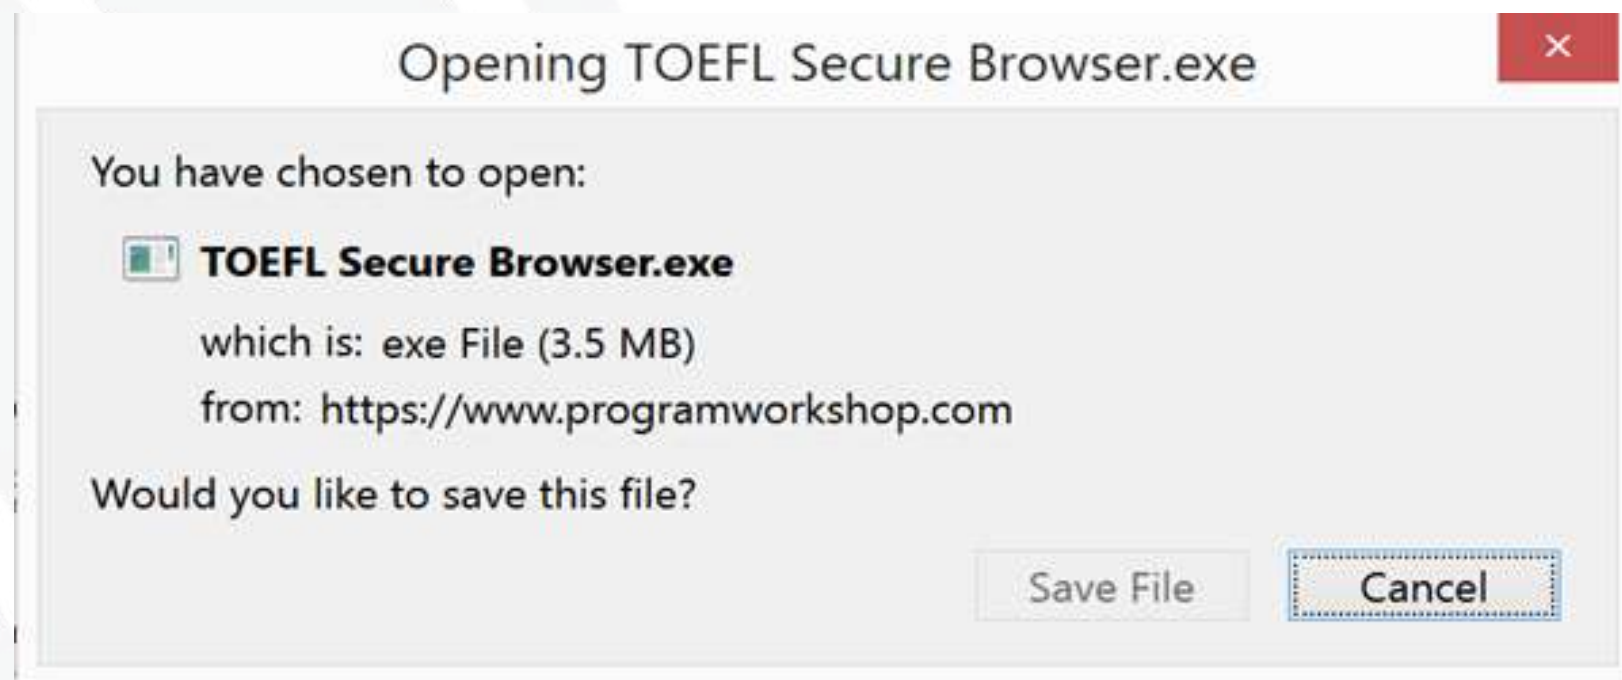

**Download on Windows**

1. Select the **Download** button located underneath these instructions.
2. Depending on your browser settings, the Secure Browser file will download in one of the following ways:
  - The file will automatically download to the default location, typically your desktop or **Downloads** folder.
  - You will be prompted to run or save the file. Select **Save**. The file will download to the default location.
3. Double-click the **Secure Browser** icon or file name to open the Secure Browser.
4. You may receive the following Security Warning: "Do you want to run this file?" Select **Run**.
5. If the Secure Browser has not been installed previously, you will be prompted that an installation is required. Click **OK**. This installation requires administrative privileges to be granted.

**Download**

## Download Secure Browser

1. Saat muncul prompt, klik “Save File”

2. File akan tersimpan di folder Downloads, lalu double click untuk menjalankan aplikasi

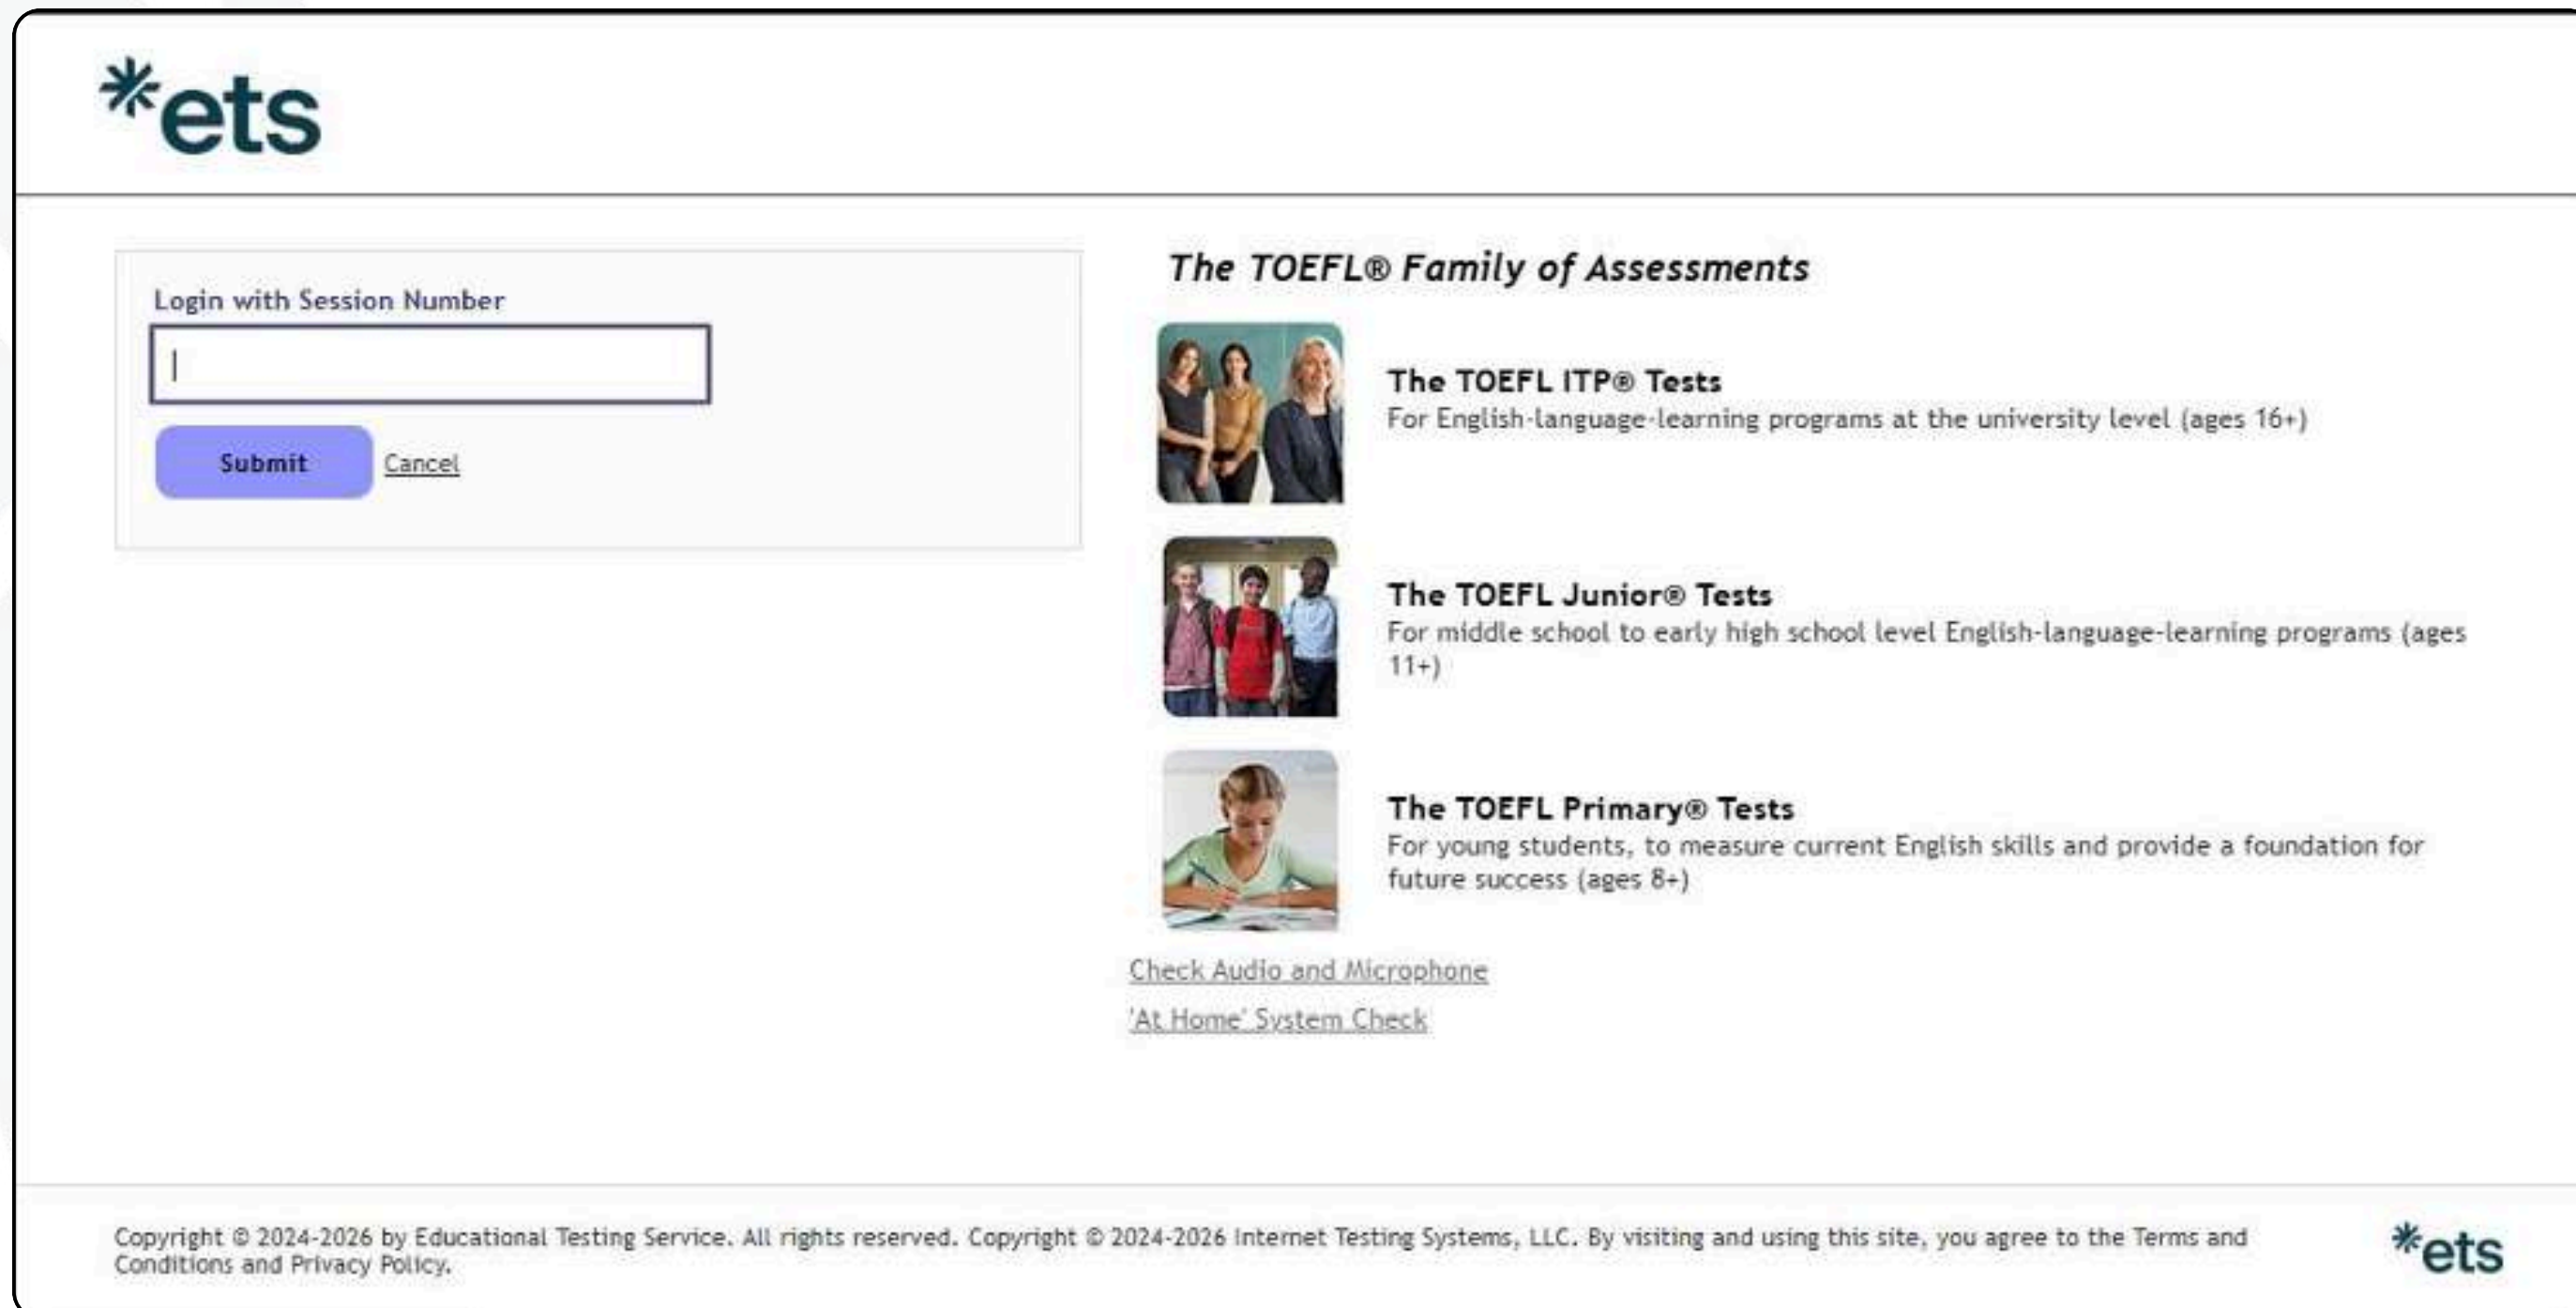

**Open Secure Browser**

## Open Secure Browser

### Buka Secure Browser yang sudah diunduh

The screenshot shows the ETS website interface. At the top left is the ETS logo. Below it is a login form titled "Login with Session Number" with a text input field and "Submit" and "Cancel" buttons.
